AMINUL ISLAM

Software Developer | React.js & ASP.NET Core
Dhaka, Bangladesh | Email: mdaminulislam2424@gmail.com
LinkedIn: linkedin.com/in/aminulislam-rb | GitHub: github.com/RD-Aminul

PROFILE

Software Developer with 3+ years of experience contributing to 20+ ERP modules and 200+ forms and reports for 20+ production client systems, using ASP.NET Web Forms, Telerik Reports, React.js and ASP.NET Core Web API. Independently built the frontend, Android app and backend API of a visitor appointment platform from requirements to deployment. Working knowledge of MS SQL Server, PostgreSQL and Oracle (queries, schema changes) and AI-assisted development.

SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Bootstrap
Backend: ASP.NET Core Web API, C#, ASP.NET MVC, ASP.NET Web Forms, REST API, Payment Gateway Integration
Database: MS SQL Server, PostgreSQL, Oracle
Mobile: React + Capacitor (Android)
Tools: Git, GitHub, Visual Studio, VS Code, IIS, Electron, HTML Reports, Telerik Reports, Crystal Reports, MS Visio, MS Office
AI Tools: ChatGPT, Claude, GitHub Copilot, Antigravity

WORK EXPERIENCE

Software Developer

Global Mediklaud (BD) Ltd. | Jul 2025 - Present

- Contribute to 20+ ERP modules with React.js and ASP.NET Core Web API, deployed across production client systems.
- Deploy ERP releases to 15+ client production environments using IIS and an in-house deployment tool.
- Write and modify SQL queries across 3 database platforms (MS SQL Server, PostgreSQL, Oracle) and troubleshoot data-related issues in ERP modules.
- Built reusable React components (including a modal) used by the whole development team across the ERP project and implemented form validation on data-entry forms.

Junior Software Developer

Global Mediklaud (BD) Ltd. | Jan 2023 - Jun 2025

- Built forms and reports for ERP modules using ASP.NET Web Forms, C# and Telerik Reports.
- Contributed to migrating the ERP from Web Forms and Telerik Reports to React.js, ASP.NET Core Web API and HTML-based reports (from 2024).
- Promoted to Software Developer in Jul 2025 after 2.5 years of consistent performance.

Intern

Azolution Software & Engineers Ltd | May 2022 - Nov 2022

- Maintained and supported 3 HRIS modules (employee management, leave, attendance); modified existing SQL queries and resolved bugs.
- Resolved issues reported by client users and handled their software support requests, from identifying the bug to delivering the fix.
- Fixed data-validation bugs in HRIS forms, reducing employee data-entry errors.

PROJECTS

Mediklaud Deployment Tool (Personal Project)

- Built an Electron desktop application that automates build and packaging for 20+ client systems, replacing manual build and zip steps with a single tool.
- Enables building and zipping any client project without opening it in an IDE with automatic detection of project folders and their current Git branch.
- Automates the release pipeline: git pull, React build, dotnet publish and IIS site/app-pool handling, packaging output into versioned, timestamped zip artifacts with live progress.
- Manages multi-environment configuration by switching client-specific database connections and API URLs before a build and restoring the original files afterward.

Appointment & Visitor Management System (Office Project)

- Developed the frontend, Android app and backend API independently, turning business requirements into a working product.
- Built 2 portals backed by 1 ASP.NET Core Web API with layered architecture: a public visitor portal (React + Capacitor, Android) and an internal admin portal.
- Public portal: 4-step booking flow with OTP-verified mobile registration and token-based access, facility selection, visitor details, slot and booth selection, online payment gateway integration and appointment slip.
- Admin portal: dashboard with appointment and occupancy statistics, registration and search, check-in/check-out, appointed-visitor lists and reports, data sync from client databases and role-based menu, report and location permissions.
- Built bilingual (English & Bangla) support in the visitor app.

ERP System Modules (Office Project)

- Contributed 200+ forms and reports across 20+ modules of an ERP platform deployed to 20+ production clients, using ASP.NET Web Forms, Telerik Reports, React.js and ASP.NET Core Web API.
- Built CRUD operations, data-entry forms and reporting features, from UI to API, across those modules.

EDUCATION

Bachelor of Business Administration (BBA) | National University | 2018
Higher Secondary Certificate (HSC) | Rajshahi Govt. City College, Rajshahi | 2014
Secondary School Certificate (SSC) | Hamidpur Naodapara High School, Rajshahi | 2012

PROFESSIONAL COURSES

Enterprise Systems Analysis & Design - C#.NET | IsDB-BISEW IT Scholarship Program (1100 hours) | Jan 2021 - Feb 2022
MS Office Application | Bureau of Manpower, Employment and Training (6 months) | Jan 2015 - Jun 2015
